Hispanico,
Madrid, Spain

Royal Institute
of Technology,
Stockholm, Sweden

Eli Lilly & Co.,
Indianapolis, Ind.

Ohio State University,
Columbus

University of Iowa
Ames

If you have access to one of those services, you know how easy it is to stay on top of what's new and relevant to your work.

BUT IF YOU DON'T, chances are you should.

Because to help you keep up with what you need to know about in the world's leading professional journals, we offer three data bases on magnetic tape.

One covers the natural and physical sciences; for all practical purposes it's our *Science Citation Index*® on tape, augmented by additional journal coverage. Another covers the journals of the social and behavioral sciences indexed by our *Social Sciences Citation Index*™. Our third tape service, *Index Chemicus Registry System*®, provides information on over 150,000 new compounds reported each year in the major organic chemistry journals of the world.

So if the organization you work for isn't using one or more *ISI* computerized data bases—and you'd like to know how it can do so and why it should—get in touch with Dept. 455b at the address below.
